14	81	Lepidodendron (extremum?) post Defensibile	

Prima

24

Di Dicerazione di generi che sarebbero indistinguibili nella collezione delle piante fossili paleozoiche

- Hs. *Chromites trichomanoides* Goepp. ad Hohenhausen presso Confluentiam (?)
- Sphaerocarpites dentatus* Sternb. ad Oldendorf (Slesia)
- Spores Brongniartii* Charlaw a Radeck (Brandeb.)
- o a New York o a canale Willard (Brandeb.)
- o a Turicum (?) in Svizzera o a Landshut in Slesia
- Dopo del N. 12 qualche genere della famiglia delle alarmiter come
- Bernia subciliolata* Sternb. nella formaz. di Branzg. di Slesia
- \* *Anarthrocanna reliquens* Goepp. a Wallenburg (Slesia)
- Bochschia flabellata* Goepp.
- o altre equisetacee come Wien
- Equisetites mirabilis* Sternb. ad Schwansee in Germania
- Columnaria intacta* Sternb. a Wallenburg (Slesia)
- Palkmannia polystachia* Sternb. a Newcastl.
- Hypurites longifolia* Lindl. & Hutt. a Clark's Hill (Nuov. Olanda)
- \* *Phyllothea Hookeri* McLay
- Dopo del N. 38 si vorrebbe una odontoptera. E vero che vi è l'odontopt. Bradii, ma esso non è nella serie delle felci, perché essendo di forma pteridica, crassicaule, si spende questo un fossile raro e speciale il pezzo si è messo dopo nelle lycopodiacee. Dintorno
- Odontopteris Schlotheimii* Brongn. a Mannedach Germ.
- Odontopteris Lindleyana* Sternb. a Leobersdorf Anglilterra
- Odontopteris altana* Brongn. a Terrason Francia
- Dopo del N. 39 si vorrebbe qualche altra cyclopteris, perché se si è appena un numero di generi non sarebbe in relazione con l'abbondanza di specie di altri generi di felci.
- Cyclopteris auriculata* Sternb. a St. Etienne & Wallenburg (Slesia)
- Cyclopteris reniformis* Brongn. a Plan de la tour presso Friburg
- può dopo il N. 40
- Schizopteris anomala* Brongn. a Saarbrück
- Dopo del N. 41 allora l'abbondanza del gen. *Hymenophyllum*
- Hymenophyllum insectum* Goepp. (Sphenopt. bifida Brongn.) - a Herminio & St. George di Chate-laison (Francia) & Wallenburg (Slesia)
- Hymenophyllum Brongniartii* Goepp. (Sphen. stricta Brongn.) - a Glasgow (Scozia)
- Rhodesia fariniformis* Sternb. a Wranowitz (Prussia)
- Trichomanites Dumorteri bifida* Goepp. (Sphenopt. bifida Lindl. & Hutt.) - a Emsburg (Prussia)
- Trichomanites Dumorteri* Goepp. (Schizopt. adnata Lindl. & Hutt.) - a Whitehaven Anglilterra

Da riportare 21 + 2\*

- Steffensia lasalleoides* Geop. — a Wallenburg (Slesia)  
*Rhinethia gymnospermoides* Geop. (Rhothopt gymnosperm Herb.) — a Charlottenburg (Slesia)  
*Diplazites longifolius* Geop. (Rhothopt longifolius Brong.) — a Saarbrück & also a Witten (Slesia)  
*Asplenites ophioides* Geop. — a Wallenburg (Slesia)  
*Woodwardites ellipticus* Geop. — " " "  
 Depo del. N. 64  
*Balanites Martii* Geop. — " " "  
*Cladocarpia pubescens* Geop. — a Gygneum (?) (Passonia)  
*Cladopites sphaeroides* Geop. — a Charlottenburg (Slesia)  
*Cladopites sphaeroides* Geop. — a Trans Gange (India)  
 \* *Glossopteris angustifolia* Brong. — " " "

- Depo del. N. 67  
*Aphalebia pateraciformis* Geop. — a Witten  
*Weissites vesicularis* Geop. — a Mannsbach (Boemia)  
*Wippera disticha* Ledeb. — a Wranowitz (Boemia)  
*Protopteris Sternbergii* Ledeb. (sigil. punctata Brong.) — a Krasowitz (Boemia)  
*Stommatopteris peltigera* Ledeb. (sigil. peltig. Brong.) — ad Alais (France) & Saarbrück (Slesia)  
*Physopteris macridens* Ledeb. (sigil. macrid. Brong.) — a Gygneum (?) (Passonia)  
*Caulopteris Schimperii* Lindl. & Hüt. — a Camerton (Somersetshire)  
*Karstenia omphalostigma* Geop. — a Charlottenburg (Slesia)

- Depo del. N. 81  
*Bergenia quadrata* Herb. — a Blass (Boemia)  
*Uledondron mauii* & minus Lindl. & Hüt. — a Busham's & South Shields & Craigleith Ingh.  
*Megaphyllum approximatum* Lindl. & Hüt. — a Jarrow (Inghelt)  
*Kanawia* ~~collina~~ Herb. — Blem " "  
*Kanawia lasinal* Lindl. & Hüt. — South Shields (Ingh.)  
*Holonia tuberculata* Brongn. — Landshut (Slesia)  
*Dechonia euphorboides* Geop. — " " "

- Depo del. N. 86  
*Cardiacospon apiculatum* Geop. — Newcastle  
*Helagmites patens* Brongn. — Loo nat. ign. (Brongn. ? a Descritte)  
*Lycopodites philogmaroides* Brongn. — Wallenburg (Slesia)  
 Depo del. N. 87  
*Bothriodendron dichotomum* — Blem

- Cycadites palmatus* Herb. — Wranowitz (Boemia) & prope Radwitz  
 \* *Leontites Heckeri* Herb. — Radwitz (Boemia)  
*Pterophyllum goniorhachis* Geop. — Königshütte Slesia  
*Cyadocoida columnaris* Geop. — Radwitz (Boemia)  
*Calamoxylon cycadoides* Ledeb. — Chomel (Boemia) & Radwitz  
 vel. Laniashire  
*Conites cocosa* Lindl. & Hüt. — Slesia  
*Cyperites bicarinatus* Lindl. & Hüt. — Swind (Boemia)  
*Paludites verrucosus* Herb. — Kraschowitz (Boemia)  
*Muscocetes primaevis* Herb. — Witten & Warden (Slesia)  
*Flabellaria principalis* Geop. — " " "

Agave lyopodiacea

- 15<sup>1. n.</sup> 82 *Lepidos pinnatis* Lindl & Hutt. *Leica (Herault)*
- 16<sup>1. n. III.</sup> 83 *Lepidos variabilis* Lindl & Hutt. *Ignat. loc. a. Schott*
- 17 84 *Lepidos comosus?* Lindl & Hutt. *Stoveria*
- 30<sup>1. n.</sup> 85 *Lepidos. rima alt ornatis* Lindl & Hutt. (compressione) *Shropshire*
- 31<sup>1. n.</sup> 86 *Lepidostichus* (compressione) *Ign. loc.*

Lomatophloeos

- 75 87 *Lom. crassicaule?* *Leica (michelle)* & *scintillaria* Brongni. *Bruna* *Autun*

Dichotyloneos gymnospermi

Sigillaria stigmatica (sigillaria m. rufus)

- 21<sup>1. n.</sup> 88 *Sig. obliquis?* Brongni. *Ign. loc.*
- 22 89 *Sig. elongata* Brongni. *Bristol*
